

# Who am I ?

- Member of Hackers.mu (#3)
- Linux system and application administrator at LINKBYNET
- Opensource contributor
- OpenSUSE Advocate and Contributor
- AMBCS – Associate member of the British Computer Society
- I live at Tunnelix.com
- Twitter @TheTunnelix

# Questions????

Send your questions during the presentation on  
59 47 04 00

The background features a series of overlapping, angular geometric shapes in shades of green and blue. A large, dark green arrow-shaped polygon points to the right and contains the text. To its right, a lighter green shape is partially visible. Below the dark green shape, a blue trapezoidal shape is visible. The overall design is modern and minimalist.

# Challenges – the Future of openSUSE-Admin

- Understanding OpenSUSE Infrastructure
- Open build service
- Visualization platform
- Factory development

# Monit

- **Tool for proactive monitoring. Its and open source utility.**
- **Can conduct automatic maintenance and repair**
- **SSLv3 in Monit**

# **SSLv3 deprecation**

- **Spreading of the disease SSLv3**
- **RFC 5748 / RFC 6101 / RFC 7568**
- **Methodology and application of the SDLC standards**

## The Winning team
